Sidelined by  
Athlete's  
Foot!

Athlete's Foot is a chronic infection caused by various types of fungus, Athlete's foot is often spread in places where people go barefoot such as public showers or swimming pools. The condition ranges from mild scaling and itching to painful inflammation and blisters. It usually starts between the toes or on the arch and may spread to the bottom and sides of the foot. Athlete's foot occurs mainly in adolescents. If your child has symptoms and is under 10 years of age contact our office. [Read More...](#)

## Tinea Infections: Athlete's Foot, Jock Itch and Ringworm

### FAQ ' s

### What is tinea?

Tinea is a fungus that can grow on your skin, hair or nails. As it grows, it spreads out in a circle, leaving normal-looking skin in the middle. This makes it look like a ring. At the edge of the ring, the skin is lifted up by the irritation and looks red and scaly. [Read More...](#)
